

# Getting Started

## Explore Data. Create Tiles. Save & Share

The new features of InCites allow you to create a customized view of the InCites dataset by utilizing the **Analytics Explorer**, a single-page toolkit for analyzing InCites data and creating tiles, the vehicle for delivering visualized data, to your dashboard, or sharing with colleagues. Create reports to which you can include tiles, and save your reports in folders that can be accessed at any time.

The Explorer consists of six **Master Tiles**, each providing a different view of the InCites dataset, and enabling you to direct the focus of your analysis by **People, Organizations, Regions, Research Areas, Journals, Books, Conference Proceedings, and Funding Agencies**.

In addition, several **InCites System Reports** are available to supplement the information you gather from the main tiles.

The screenshot displays the InCites Analytics Explorer interface. At the top left, the logo reads "InCites™ Calibrate Your Strategic Research Vision". The navigation bar includes "Dashboard" and "Analytics" (the active tab). A callout box points to the "Analytics" tab, stating: "Create reports and folders to save and organize your information." Below the navigation bar, a "New in InCites" notification and a "My Folders" button are visible. The main content area is divided into two sections. The first section, "Explore InCites Data", is highlighted with a callout box: "Explore the InCites dataset and create custom tiles." It features six master tiles: "People" (person icon), "Organizations" (classical building icon), "Regions" (globe icon), "Research Areas" (lightbulb icon), "Journals, Books, Conference Proceedings" (document icon), and "Funding Agencies" (money icon). The second section, "InCites System Reports", is highlighted with a callout box: "Access specially designed InCites System Reports from Thomson Reuters." It contains four report tiles: "Local Journal Utilization Report", "Research Performance", "Collaborations", and "Institution Profile". Each report tile includes a "Learn More" link and a "Run" button.

Getting Started will walk you through the workflow of the Explorer for the Master Tiles, creating a customized view of the InCites dataset, and capturing that view with an accompanying visualization to create unique tiles that you can save to your **Dashboard**, a report, or to share with others. In addition, we will set up folders in which to save our reports.

The remainder of the InCites Help documentation provides further detail for each component of the Explorer, as well as numerous use cases that allow you to view how the different Master Tiles can be customized to create meaningful, insightful tiles that can be used as building blocks for reports.
